

Some contributions of Professor Mihai Botez in the physical education topic

Cristian Bârsu

“Iuliu Hațieganu” University of Medicine and Pharmacy, Cluj-Napoca

Abstract

Mihai Botez was member of the first generation of professors which created the Romanian Faculty of Medicine in Cluj. He was considered the founder of Romanian teaching of bacteriology for the medicine students in Cluj. Between 1923 and 1940 he directed the Department of Experimental Pathology of the Faculty. The paper presents a little known chapter of his contributions in promotion of physical education for medical students. Botez performed important conferences concerning the sanogenetic role of physical education and sport.

Keywords: physical education, sport, medicine, health.
