Abstract

The basic goals of the European Association of Majorettes (EAM) are encouragement and promotion of the majorette-dance and common interests of the members, as well as encouragement of the gathering and allying of all majorettes in association and unions, in order to materialize interests of the members and to promote majorette-dance. Because of that, there is necessary a proper rule system which contains all the aspects of this sport and allows an easy evaluation of teams which are participating in competitions.
