

## **DOPING IN SPORTS**

### **Genetic Doping (Note II)**

#### **Abstract**

Doping is a real threat to health and to sports. It is also a real danger to the ethical, cultural, educational and socio-economical values that they believe in.

Genetic doping, as derived from the therapeutic use of genic therapy, has lately become a new threat to sports. Genetic doping is a high technique type of doping realized by cellular and genic therapy. It is the ineluctable reality that raises issues such as: its advantages and disadvantages, its legality and its impact on sports performance.

**Keywords: doping, genes, muscle proteins, physical exercise.**
